

EU ECHA Adds Four New Substances to the Candidate List of SVHCs

On July 19, 2019, European Chemical Agency (ECHA) has added four more substances to the Candidate List of very high concern (SVHCs). Hence, the total number of SVHCs increases from 197 to 201

The 4 chemicals newly included and their hazard properties are as follows:

Chemical name	EC number	CAS number	Concern	Possible use(s)
2-methoxyethyl acetate	203-772-9	110-49-6	Toxic for reproduction (Article 57 (c))	Not registered use
Tris(4-nonylphenyl, branched and linear) phosphite (TNPP) with \geq 0.1% w/w of 4-nonylphenol, branched and linear (4-NP)	-	-	Endocrine disrupting properties (Article 57(f) – environment)	Primarily used as an antioxidant to stabilise polymers.
2,3,3,3-tetrafluoro-2-(heptafluoropropoxy)propionic acid, its salts and its acyl halides (covering any of their individual isomers and combinations thereof)	-	-	Equivalent level of concern having probable serious effects to the environment (Article 57(f) - environment) Equivalent level of concern having probable serious effects to human health (Article 57(f) – human health)	Processing aid in the production of fluorinated polymers.
4-tert-butylphenol	202-679-0	98-54-4	Endocrine disrupting properties (Article 57(f) – environment)	Used in coating products, polymers, adhesives, sealants and for the synthesis of other substances.
